## Readme

### Introduction

Addix is a Tetris style game where the goal is to add up the falling tiles before they reach the bottom of the screen. Use the rotating plus signs as wildcards. Add tiles together before the timer bar runs out to increase your score multiplier.

Addix has 10 achievements to unlock based on score. See if you can unlock them all!

### Installation

Addix installation is simple. The SIS file will automatically install the Addix game onto your C: drive. A launcher will be created automatically and placed in the applications menu. Once installed the application can be run by clicking on the application icon within the application menu.

### Screen Orientation

Addix is designed to play only in portrait mode. The application will not rotate to fit the screen in a landscape/widescreen mode. This is the expected behavior.

### Backup

This application is not intended to be backed up. If you need to restore your device, please re-download the application and reinstall it.

### Change Log

v1,00,1

- fixed exit key on game play screen to exit the app properly
- fixed calculation for average score on stats screen

v1,00,0

- New Addix game released

## **User Guide**

### **Starting Addix**

Once you've successfully installed Addix, proceed to your applications menu and look for the Addix icon. Click or tap this icon to launch the game in the native flash lite player.

### **Playing Addix**

On the main screen select the Play option.

To play Addix, you must add up two falling blocks so they are the sum of the highlighted block at the bottom of the screen. Each correct answer multiplies your score up to 8x.

Each multiplier will last as long as the yellow timer bar is highlighted. When the timer bar runs out your multiplier returns to 1. Each successful addition refills the timer bar.

You can click the yellow timer bar to advance one row of blocks if you need another row to appear on the screen.

You can use the rotating plus signs as wild cards. Add the wildcard to any number on the screen, and it will clear the highlighted number.

When the blocks reach the bottom, the game is over.

### **Viewing game stats**

To view your game stats, go to the main screen and select the Stats button. The stats screen will display your most recent score, your highest score, your average score over time and the number of games you've played.

You can clear this data with the Clear button. Once you have cleared the data there is no undo, so be sure you want to erase your scores before you click the Clear button.

### **In Game Help**

To view the in game help screen, go to the main menu and click the Help Button. There you can navigate through a graphical tutorial on how to play Addix.

### **Exiting the game**

To exit the game you can choose the Exit button available during game play, or the Exit button in the main screen of the application. This will close your current game and leave the application.
